In 4Q 2023 expected increase in past due exposure, due to a new interpretation regarding the «Definition to Default, DoD» provided by Bank of Italy to the Company for prosolvedo transaction, after the inspection conducted in 4Q 2022.

Specifically, the Autorithy clarified that the trigger for the count of the past due day starts when the past due is above 1% of the exposure (and above the absolute value of 100 or 500 euro depending on the counterparty), notwithstanding the nominal value of the portfolio of receivables and the cushion between the nominal value and the exposure of the company.

In relation to the new interpretation of the DoD, we expect the **Gross NPE Ratio to go up in the range of 1-3%**, vis-a-vis the market average (Assifact) of 3.6% at the end of Q2 2023.

Factoring Market and Distressed Financing

What is Factoring? (1/2)

What is Factoring? (2/2)

□Credit management (debtor management and payment collection) is the **core business** of a factoring company and allows the creditor to outsource activities that are usually carried out in-house, thus achieving:

- Greater effectiveness (credit management is the core business of a Factor)
- Greater efficiency (a Factor can leverage on economies of scale)

In the **credit insurance** service, the Factor analyses the specific features of the assigned receivables and can issue a solvency auarantee

In the working capital financing service, the Factor differs from a bank since it analyses the assigned receivables/debtors in addition to performing the usual creditworthiness assessments

MANAGEMENT

FURTHER KEY TAKEAWAYS ON FACTORING

- ☐ Factoring is a flexible tool for the management of working capital, offering a wide range of services to release, manage and successfully deliver trade receivables:
- ☐ The legal instrument underpinning factoring is the assignment of receivables in accordance with Law no. 52 of 21 February 1991 (Law on the assignment of receivables).

Leader in the high-growth distressed market segment

In the overall fast growing factoring market (turnover in Italy is expected to grow from € 287bn in 2022 up to €294-€303bn in 2023) Generalfinance focuses on distressed sellers (UTP, forborne and past due) with a portfolio of performing debtors (in bonis)

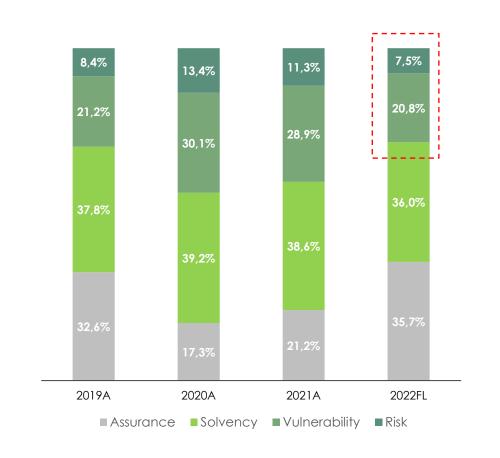

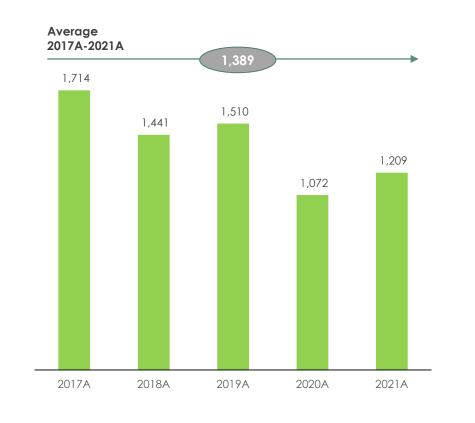

Vulnerable companies and new non-bankruptcy procedures

CERVED GROUP SCORE (CGS)

NON-BANKRUPTCY PROCEDURES

More than 28% of SMEs are in vulnerability or risk condition

An annual average (2017-2021) of 1,389 companies entered nonbankruptcy procedures

Digital, Low Risk Player

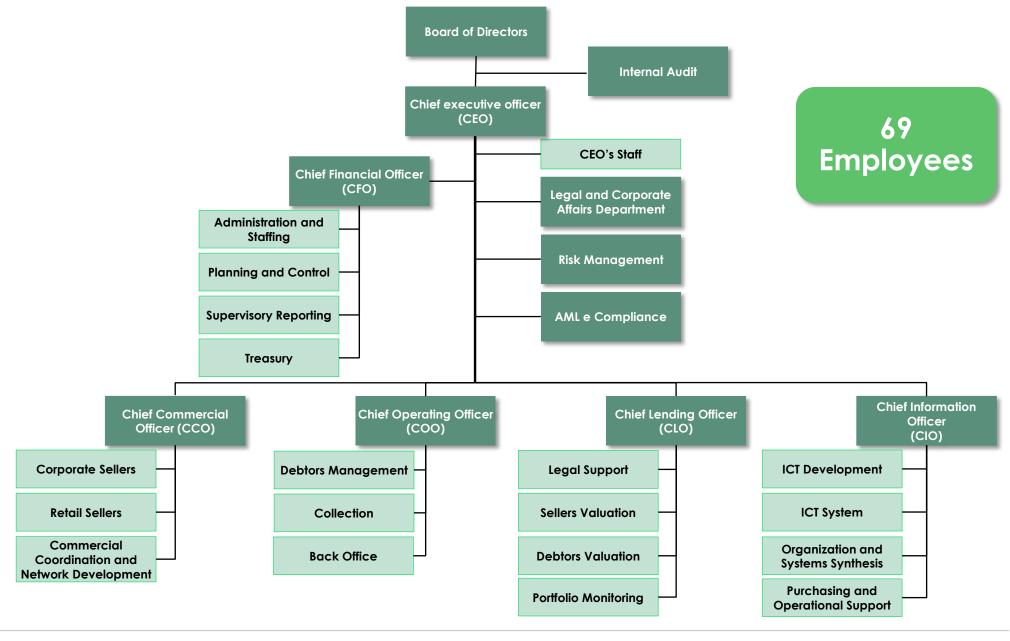

A strategic asset: the proprietary digital platform

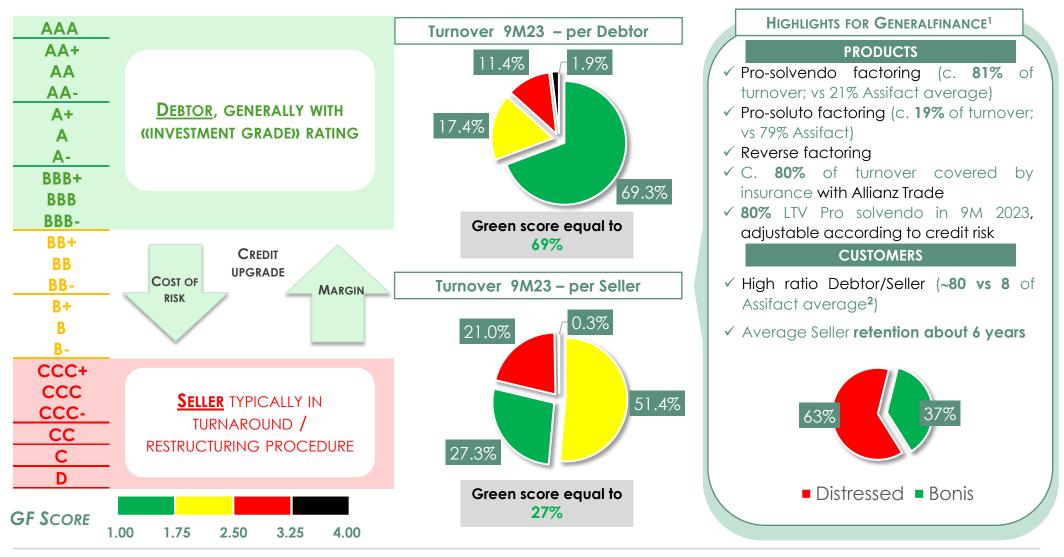

An organization oriented to risk control and business

A unique business model, leveraging the factoring features

The peculiarity of Generalfinance's business model is the choice of Seller-Debtor, where clients (**Sellers**) typically have a **low credit rating** (turnaround situation) while the **Debtors** underlying customer loans refer to a **high credit rating** (normally investment grade)

Value proposition, distinctive features and value chain

1 Value proposition

Generalfinance offers its customers (mostly companies under financial stress) rapid and customized interventions for the financing of the working capital and trade receivables, covering the entire supply chain finance

Factoring Pro-Solvendo

> Factoring Pro-Soluto

"Revolving" relationship (LIR¹ at 24 months) in a predominantly "notification" mode and, where applicable, "acceptance" of the debt

Distinctive skills

- o Consolidated expertise throughout the entire process
- End-to-end in-house valuation process, tailored to customer specifications
- o Strong risk reduction and diversification mechanisms
- In-house-developed proprietary factoring platform to support business specifications
- Fast operational processes and capability to provide
 bridge financing within turnaround processes

Generalfinance masters all the crossroads of the value chain

- o All operational steps and core activities are **carried out internally** by Generalfinance's dedicated structures
- Generalfinance does not relies on external consultants to assess the creditworthiness of sellers and debtors but owns all the skills
- o The process is reinforced by **credit insurance policies** provided by Allianz Trade insurance company which, during the risk acquisition phase, performs an independent assessment of the assigned debtors, providing Generalfinance a feedback on the results of their assessment

Collection performance: a strategic delivery to our Customers

Generalfinance boasts a portfolio quality, both in terms of Payment Conditions and Payment Delays, better than the rest of the market

Risk reduction in Distressed Factoring

Given that the majority of Generalfinance's turnover is realized towards distressed Sellers, the Company can benefit from a reduction in risk, because of 3 main factors

Lower Operating Risk

Lower Risk of Clawback Action

 Effects of insolvency proceedings on financial position (ex. credit write-offs)

Lower Credit Risk

- o Recovery and relaunch plan
- o Possible change in the Governance
- Possible capital injection or new financing
- o Predeductibility (i.e., superpriority) of receivables arising from loans disbursed in execution of the plan and loans disbursed prior to the submission of the composition with creditors plan, respectively, if the conditions provided by the regulations are met

- Court approval (arrangement with creditors, restructuring agreement)
- Supervision by the court commissioner (arrangement with creditors)
- Presence of high standing Financial Advisors and Legal Counsels
- Management change

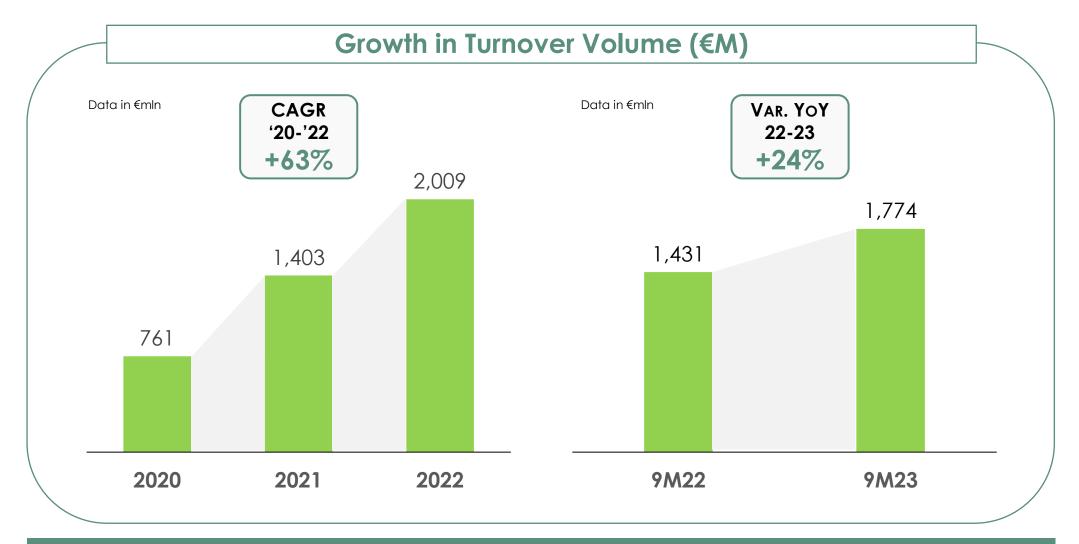

- Financial assistance for the implementation of the agreement / plan / arrangement with creditors with exemptions from clawback actions
- Authorization for bridge financing (in these cases, the risk of clawback actions is excluded on a de facto basis)
- Factoring law and related protections (clawback actions regarding collections from assigned debtors)

DEFINITION OF DEFAULT (DOD)

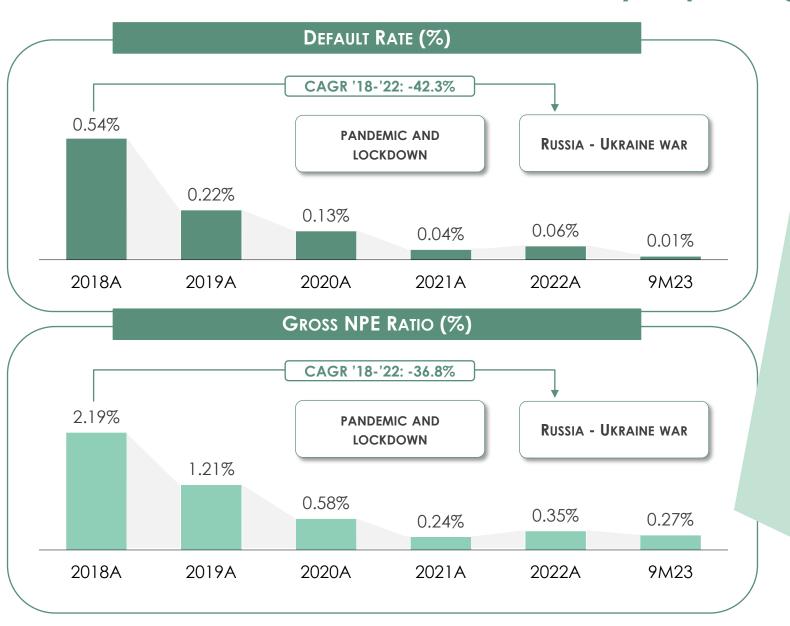

In 4Q 2023 expected increase in past due exposure, due to a new interpretation regarding the «Definition to Default, DoD» provided by Bank of Italy to the Company for pro-solvedo transaction, after the inspection conducted in 4Q 2022.

Specifically, the Autorithy clarified that the trigger for the count of the past due day starts when the past due is above 1% of the exposure (and above the absolute value of 100 or 500 euro depending on the counterparty), notwithstanding the nominal value of the portfolio of receivables and the cushion between the nominal value and the exposure of the company.

In relation to the new interpretation of the DoD, we expect the <u>Gross NPE</u> <u>Ratio to go up in the range of 1-3%</u>, vis-a-vis the market average (Assifact) of 3.6% at the end of Q2 2023.

In FY 2021, Generalfinance paid an average advance equal to **80%** of Turnover. With regard to the prosolvendo factoring, Generalfinance is entitled to set off amounts owed by the Sellers to it against amounts owed by Generalfinance to the Sellers based on specific clauses included in the factoring agreement.

The Company has a high Debtor/Seller ratio equal to **58**, growing steadily over the last 3 financial years, against an average of the Italian factoring market - calculated excluding private assigned Debtors - equal to 10¹, which expands the possibilities of offsetting between receivables and debit items against the Sellers as part of pro-solvendo transactions.
